

# VIDCHAIN: THE FUTURE OF DIGITAL IDENTITY

VIDchain helps people use their digital identity and provides companies with secure access processes for their users.

[www.validatedid.com](http://www.validatedid.com)

We offer a decentralized service of Self-Sovereign Identity (SSI) based on Blockchain for processes of verification of digital identities and their attributes.

This solution ensures compliance with GDPR and greatly facilitates processes such as customer onboarding and policies of the KYC or AML type.

We are part of national and international consortia such as DIF, Alastria and Sovrin, with whom we work together to establish an open ecosystem of decentralized identity accessible to everyone.

## FOR PEOPLE: YOUR IDENTITY AND YOUR DATA ALWAYS IN YOUR HANDS

- **MORE SECURE:** Cryptography and Blockchain allow that your identity is always protected.
- **MORE SIMPLE:** Validate your digital identity with whoever you want in an easy way.
- **MORE UNIVERSAL:** Based on standards that eliminate the need to have hundreds of credentials.

## FOR COMPANIES: IMPROVE THE ACCESS OF YOUR USERS

- **MORE EFFICIENT:** Improves processes and reduces the costs of identity verification.
- **MORE SECURE:** Implement secure identification processes and improve anti-fraud measures in compliance with eIDAS and GDPR.

## AWARDS & RECOGNITIONS / PARTNERS

- Winner 2019 Cuatrecasas Acelera.
